

Containerized / Modularized Oxygen generator thru PSA system

Salient Features

Salient Features

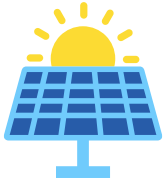

Our Oxygen Analyzer Sensors Have **10 Years Life Without Need Of Calibration**. All Indian or other sensors require frequent calibration. This may lead to inaccurate reporting of oxygen quality & endangers human lives. Our sensor is of Zirconium material.

- Our EU Air Dryers Ensure Quality Inlet Air To PSA Module that helps to extend the life of PSA unit & molecular sieve (Replenishment Assured Only Once In 4 Years)
- Zeolite Replacement will be once in four years only
- Plant Oxygen Piping Network can be executed on Turnkey
- Designed, Fabricated, Installed & Maintained by Oil & Gas professional team.

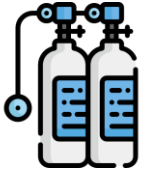

Salient Features

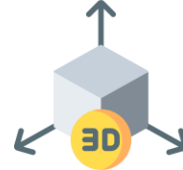

Dual compressors with automatic switch over, ensures unhindered production at all times

Our solar powered containerized / modularized oxygen generator literally makes zero consumable cost. huge savings on power bills. operational at all conditions & all terrains.

Certain versions are mobile units, easy for relocation & remote production of oxygen

Our 3D design models & subsequent review with client ensures quality installations

Molecular sieve / zeolite is "USA" manufactured, reliable in quality & life

All major equipment's are EU manufactured / No Chinese policy strictly followed

Salient Features

Remote equipment data access & control system ensures the continuous performance monitoring of the individual equipment's, that helps in identifying failing equipment's even before the event. this will prevent valuable life's of men & equipment. unique with us.

Active Automatic Fire Suppression System Ensures Safety Of Men & Material

Full Financial Solutions & Subsidy Claim Assistance

Annual Maintenance Contract Options Available

Inbuilt Oxygen Analyzer – Eu Make Ensures Accurate Oxygen Quality

Salient Features

Early Fire Detection & Warning System

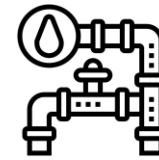

Our Sterile Filters Ensure Bacteria Free Oxygen

Easy To Operate & Fully Automatic

CCTV Monitoring

All SS316 Piping System

2 Years Warranty
